

Plastic Filters

3" T Type Disc Filter

2" T Type Disc Filter

Features and Benefits

- Available in 2" & 3" NPT male thread Connection
- Body made of reinforced Polypropylene for durability
- T-configuration makes installation easier for combining multiple filters to increase filtration capacity
- Easy to open the disc chamber by unlocking the stainless steel spring loaded clamp
- Wide range of flow rates
- Three way valve assembly for easy monitoring of inlet and outlet pressure
- Helix effect to separate solid particles
- Manual and automatic filter systems available upon request

Specifications

Description	2"	3"
Closing System	Stainless Steel Clamp	
Max Pressure	150 psi	150 psi
Disc Mesh Size	120	120
Range of Flow Rate, gpm	96 to 154	198 to 228
Nominal Flow Rate, gpm	132	220
Pressure Drop @Nominal	4.2 psi	4.2
Filtration Surface Area	184 sq.in.	262 sq.in.
Filtering Cartridge	Polypropylene	
Cartridge Diameter	5.14 inch	5.14 inch
Cartridge Length	15.5 inch	20.2 in.
Weight	13.4 lbs	17.1 lbs.
