
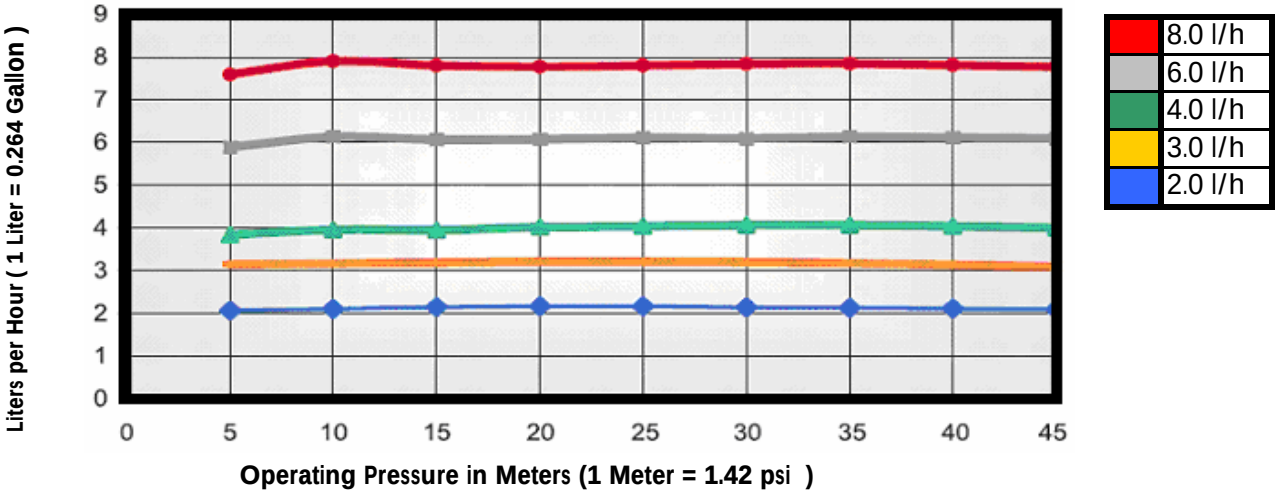
Features

Pressure Compensating Dripper
Uniform flow rae from 8 to 60 psi.
Non leak feature opens at 5.5 psi and closes at 4 psi.
For use with systems containing long lateral and big slopes.
Suitable for orchards, vineyards, green houses, nurseries,
and wherever a precise flow rate is required
Turbulent flow to avoid sedimentation and clogging.
Constructed of latest generation polymers to ensure long life
and resist commonly used chemical agents and fertilizers.
Base color identifies flowrate



Description	Model	Bag / Box Qty.	List Price Each
Non - Pressure Compensating Dripper			
Non-Pressure Compensating Dripper 1/2 gph	51-WD-2	500 / 3000	0.22
Non-Pressure Compensating Dripper 1 gph	51-WD-4		
Non-Pressure Compensating Dripper 2 gph	51-WD-8		
Pressure Compensating Dripper			
Pressure Compensating Dripper 1/2 gph	51-WPC-2B-I	500 / 3000	0.37
Pressure Compensating Dripper 3/4 gph	51-WPC-3B-I		
Pressure Compensating Dripper 1 gph	51-WPC-4B-I		
Pressure Compensating Dripper 1 1/2 gph	51-WPC-6B-I		
Pressure Compensating Dripper 2 gph	51-WPC-8B-I
